Profile

Passionate software engineering graduate from the Cape Peninsula University of Technology with 3 years of experience in software development. **Creative** full-stack engineer who prides on details and achievement. Seeking to use acquired skills in JavaScript, PHP, and C#, and to learn about multiple techs.

Employment History

Programming Tutor, CPU

Aug 2018 – Aug 2019 Cape Town, South Africa

I tutored students who had difficulties in mathematics and programming. My job was to help them understanding the basics of C++ which we used to build embedded system with Arduino.

Intern software developer , Nona digital

Feb 2019 – Feb 2020 Cape Town, South Africa

I worked at Nona digital as an intern software developer.

I started at a QA position where I wrote the end to end test for the site and was later on the front-end side of projects, where I restyled some important part of the website I was working on.

And finally, I tested the entire project using the Cypress library.

I worked as a front-end developer in projects such as

www.gostackr.com, www.go2africa.com

Junior Software developer, Codeswop

Dec 2020 – Jun 2021 Cape Town, South Africa

I worked at Codeswop as a front-end developer.

During my spell at Codeswop, the MeditPet project I worked on had to go through some refactoring, and using my knowledge of React and Redux, we changed some functionality and styling across the site.

Frontend Software developer , Fireworkx

Sep 2021 – Present Cape Town, South Africa

- Implemented and updated application modules under the direction of Senior Software Developers.
- Effectively coded software changes and alterations based on specific design specifications.
- Built and implemented different type of innovative software.

[My Portfolio](#)

Hobbies

Reading science and technology books

Coding and learning new languages

Playing piano

Singing in a choir

Doing sport (soccer, gym)

I have worked and am working on different projects, providing my frontend engineering skills, applying javascript, HTML and CSS in projects such as :

- Santamre (www-acc.santamre.com)

- Santam.co.za

- MandG (Prudential)

- AndyCab

Frontend Software developer, Smartsplash 360

May 2023 — Present  Cape Town

As a front-end software developer at Smart Splash 360, I leverage Nuxt 3, Typescript, and Tailwind CSS to transform UI/UX designs into interactive interfaces, seamlessly integrating with a PHP back-end.

Education

Mater Dei, Matric

Jan 2008 — Jun 2014  Kinshasa

I majored in Biology and chemistry, combined with mathematics, physics and communication skills

UNIKIN, Preparatory Polytechnic

Oct 2016 — Jun 2017  Kinshasa

I started my electrical engineering path in Polytechnic at the University of Kinshasa where I acquired mathematical, and physical skills

I learned how to have a logical thinking and a problem solving mentality, how to approach complex mathematical and physical problems

Cape Peninsula University of Technology , National Diploma

Feb 2017 — Dec 2020  Cape

My electrical engineering studies at CPUT helped me to clearly understand the concept of electrical engineering and better embrace the computer system world , including Network , IT essential and Programming.

LinkedIn Learning,Udemy, W3School and Edx

Aug 2019 — Present  Online

As an intern at Nona digital, I studied basics and advanced topics about programming languages such as

- JavaScript (*ReactJS, VueJS Express NodeJS, GraphQL, Socket.io*)
- PHP (*OOP-PHP, Laravel*)
- HTML, CSS, Bootstrap
- SCSS, Sass
- Asp.net core

Computer Skills

Frontend stack

- HTML, CSS (SCSS, Sass, **TailwindCSS**)
- Bootstrap, JQuery, MATERIAL UI
- JavaScript (*ECMAScript, DOM manipulation*)
- React.JS (*React Hooks, Context, Redux, Styled Component*, React-bootstrap)
- Next JS (Server Side Rendering)
- Vue.JS (*Routing, Pinia state management* , Vue-router, Composition API)
- NuxtJS (Server Side Rendering)
- **Third-party :**

Git,GitHub, NPM, yarn, GitLab, Slack, JIRA, Agile, Composer, ...

Backend stack

- Node.Js: (*ExpressJs, Socket.io, GraphQL*)
- GraphQL: (*GraphQL-yoga,Prisma ORM, GraphQL-express*)
- PHP: (*Laravel, WordPress*)
- Java: (*Basics of Java Concepts, OOP*)
- C# .net : (*Basic concepts, OOP, currently learning ASP.net Core*)
- Meteor Js : (*A JavaScript full-stack framework*)

Database (Oracle, MySQL, MongoDB, Microsoft Access)

I have worked with Oracle and MySQL during my university years and beyond those years, I have enhanced the skills I acquired at university from my studies

I learned MongoDB and built couple of projects using it.

Agile Methodology

During my internship I learned and applied the Agile methodology while working in projects.

Using Jira board, standups, Slack, and Sprint
